FIFTH CENSUS OF CANADA, 1911.

MANUFACTURES OF CANADA FOR 1910 BY PROVINCES AND DISTRICTS.

The census of the manufactures of Canada taken in June 1911 for the calendar year 1910, as presented in this Report, denotes a gratifying movement of the country's industrial prosperity during the last decade. Compared with the census of 1901 for the year 1900 it shows an increase in the ten years of 4,568 in the number of working establishments, of $800,667,122 in the value of capital, of 176,030 in the number of persons employed, of $127,759,066 in the earnings of salaries and wages and of $684,922,264 in the value of products. Compared with the census of 1905, which was taken in 1906 through the medium of the Post Office, it shows as increase in five years of $400,998,586 in the value of capital, of 122,673 in the number of persons employed, of $75,908,405 in the earnings of salaries and wages and of $447,623,036 in the value of products.

The following table gives the principal statistics for the two census years 1900 and 1910, together with the total increase and the increase per cent in the decade, viz.:

Schedule	1900	1910	Increase	
			totals	per cent.
Establishments.....NO.	14,650	19,218	4,568	31·18
Capital.....$	446,916,487	1,247,583,609	800,667,122	179·15
Employees on salaries.....NO.	30,691	44,077	13,386	43·61
Salaries.....$	23,676,146	43,779,715	20,103,569	84·91
Employees on wages.....NO.	308,482	471,126	162,644	52·72
Wages.....$	89,573,204	197,228,701	107,655,497	120·19
Raw and partly mfd materials.....$	266,527,858	601,509,018	334,981,160	125·68
Products.....$	481,053,375	1,165,975,639	684,922,264	142·38

Comparing the returns for 1905 and 1910 the per cent increase of capital in five years was 47·36, of employees on salaries 20·77, of salaries 42·49, of employees on wages 32·32, of wages 46·77 and of products 62·31. No record was taken of the value of raw materials for the year 1905. Comparing the returns for 1900 and 1905 the per cent increase of capital was 89·43, of employees on salaries 18·91, of salaries 29·77, of employees on wages 15·41, of wages 50·02 and of products 49·32.

The instructions for taking the census of manufactures have been closely uniform for each of the three years, and have been made so plain that no reasonable doubt should have existed in the minds of enumerators as to their meaning. The term 'capital,' which is often misunderstood because it often implies a man's good name, has been explained for census purposes as (1) the land, buildings and plant of a factory, which is visible, and (2) the working capital as the stock or cash of the business. For the sake of uniformity therefore the capital employed in a manufacturing establishment has been defined as consisting of '(1) value of land, buildings and plant occupied by the factory, and (2) the amount of the working capital employed, which may include money borrowed for carrying on the factory operations.' It meant the capital for the census year and would be practically the capital for every year, as it often happens that money is borrowed to carry on operations. This definition, together with other instructions, was printed on the back of the schedule as well as in the book of instructions, and a copy was required to be left by the enumerator with the manufacturer for his guidance. The enumerator was further required to assist the manufacturer to answer all the questions of the schedule or 'leave it to be filled up at a date to be mentioned in the signed notice at the foot of the schedule,' when he would call for and receive it duly made out. In many concerns where the business was simple the answers might be given offhand to the enumerator; while in others, which were extensive and complex, time might be gained by arranging with the owner or manager to make the entries carefully and in agreement with the book of entries or records of the factory. We were dealing with business men.

Table 1 gives the manufactures of Canada and the provinces, showing the statistics of establishments, capital, salaries and wages, cost of materials and values of products by kinds of industries.

The earnings of salaries and wages of employees relate to all officers, managers or workers to whom employment was given during the year 1910, as well as for 1900 and 1905, separated as (1) men and women, (2) children under 16 years of age, and (3) piece-workers employed outside of the works. For men and women over 16 years of age the numbers are given in the following table together with salaries and wages, viz.:

Census year.	Persons on Salaries				Persons on Wages			
	men	$	women	$	men	$	women	$
1900....	28,540	22,994,574	2,151	681,572	226,663	75,626,888	61,220	10,757,590
1905....	31,545	28,938,637	4,951	1,785,449	288,039[1]	119,550,821	68,001[1]	14,825,104
1910....	37,702	40,927,955	6,375	2,851,760	376,872	173,435,642	72,571	18,970,212

[1] Including persons under 16 years.

The number of workers on wages under sixteen years in 1900 was 12,143 with earnings of $1,288,488, and in 1910 it was 13,282 with earnings of $2,112,648. The number of piece-workers employed outside of the works was 8,456 in 1900 with earnings of $1,900,238, and 8,401 in 1910 with earnings of $2,710,199. The earnings of these two classes constitute 3·56 per cent of all wages in 1900 and 2·45 per cent in 1910. They were not separated in 1905.

The instructions for the census of 1901 provided that no factory should be so recognised which employed less than five persons, but made exceptions in the case of butter and cheese factories and brick and tile works, in which industries comparatively large operations may be carried on with less than five employees. But it was observed that the same rule might have been applied in the case of flour and gristing mills and electric light plants, and in the censuses of 1906 and 1911 the exceptions were extended to the industries of flour and gristing mills, saw and shingle mills (lumber products), fish curing plants, lime kilns and electric light and power plants, as well as butter and cheese factories and brick and tile works when operated by less than five persons. These exceptions added $8,886,303 to the value of capital in 1905 and $14,658,010 in 1910, and to the value of products $8,901,486 in 1905 and $17,753,848 in 1910. They did not however affect to more than a negligible extent the totals of all industries, being a little more than one per cent of the value of capital in 1905 and 1910, 1·24 per cent of the value of products in 1905 and 1·52 per cent in 1910.

The reduction of the number of industries in 1905 employing less than five persons, as explained in the report for that year, was owing in part to the merging of small industries with larger concerns under one management, and also that in the case of large establishments carrying on several kinds of industries one return was made for 1905, whereas for 1900 separate returns were made for each kind. The merging of industries continued to operate during the second period, so that while the number employing five hands and over was 12,547 in 1905, and 16,207 in 1910, as compared with 14,650 in 1900, the values of their products had risen in the successive census periods from $481,053,375 in 1900 to $706,446,478 in 1905 and to $1,148,221,791 in 1910.

A table of groups of products by industries gives for each of fifteen groups the number of establishments, the capital employed, the number of employees on wages, the earnings of wages, the cost of raw or unfinished materials and the value of products. It shows for industries exceeding $60,000,000 the first place as measured by values of products to be taken by food products, the second by timber and lumber and their re-manufactures, the third by textiles, the fourth by iron and steel products, the fifth by miscellaneous industries, the sixth by metals and metal products other than steel, the seventh by vehicles for land transportation, and the eighth by leather and its finished products. Exclusive of employees on salaries, which were in number 44,077 and in earnings $43,779,715, the figures are here given, viz.:

Totals and averages	19,218	515,203	1,165,975,639	26·8	60,671

For groups producing under $200,000 in 1910 there were 18,121 establishments with $431,336,533 for value of products, employing an average of 14.1 persons and giving an average production of $23,803. For groups producing $200,000 to under $500,000 in 1900 there were 323 establishments with $94,531,698 for value of products, and in 1905 there were 479 with $145,587,183. For groups producing $500,000 to under $1,000,000 in 1900 there were 68 with

$46,729,825, and in 1905 there were 139 with $92,065,800. For groups producing $1,000,000 and over there were 39 with $71,051,834 in 1900 and 81 with $177,273,913 in 1905. The average value per establishment producing $200,000 to under $500,000 was $292,668 in 1900, of $303,940 in 1905 and of $306,005 in 1910, compared with an average producing $500,000 to $1,000,000 of $687,203 in 1900, of $662,344 in 1905, and of $677,572 in 1910, and an average over $1,000,000 of $1,821,842 in 1900, of $2,188,567 in 1905 and of $2,393,471 in 1910. One establishment in Nova Scotia gave a product in 1910 of more than $8,000,000, one in Ontario gave more than $9,000,000, and two in Quebec gave more than $10,000,000. Fourteen establishments of the highest class in the Dominion gave for 1910 an average of $6,995,677.

Compared by provinces the census of manufactures shows the following records for the years 1900, 1905 and 1910 as taken in the years 1901, 1906 and 1911 viz.:

The increase of capital employed in the industries in the first period of ten years was 34·76 per cent, in the second period 179·15 per cent, and in the twenty years 276·19 per cent. The increase in the earnings of salaries and wages was 42·96 per cent in the first period, in the second period 112·75 per cent, and in the twenty years 204·17 per cent. The increase in the values of products was 30·47 per cent in the first period, in the second period 142·38 per cent and in the twenty years 216·24 per cent. The greatest increase in the values of capital employed was made in the group of miscellaneous industries, being $191,956,786 or 444·43 per cent; the greatest increase in the earnings of salaries and wages in the group of timber and lumber and their re-manufactures, being $27,376,899 or 146·72 per cent; and the greatest increase in the values of products in the group of food products, being $169,710,334 or 223·42 per cent.

The province with the highest rate of increase in the value of products in the ten years 1900 to 1910 is Alberta, with 1,330·64 per cent, and the amount of increase is $17,475,506. Manitoba made in the same period an increase of $40,746,139 or 315·19 per cent, British Columbia an increase of $45,756,457, or 234·77 per cent, Quebec an increase of $192,613,662 or 121·69 per cent, Ontario an increase of $338,276,739 or 140·05 per cent, Prince Edward Island an increase of $809,762 or 34·80 per cent, and Saskatchewan $5,680,465 or 871·68 per cent as in the following table:

The cities and towns are arranged in the order of their population, from Montreal to Galt, and as constituted for municipal purposes. Montreal in 1890 had a population of 219,616, with manufactures valued at $67,654,060. In twenty years the increase of manufactures has been 145·81 per cent. Toronto, whose population in 1890 was 181,215, has increased the values of its manufactures in twenty years by 243·18 per cent. Winnipeg, with manufactures valued at $5,611,240 and a population of 25,639 in 1891, occupies the third place, with an increase of 482·65 per cent in values in the same period. Vancouver, whose population in twenty years has grown from 13,709 in 1891 to 100,401 in 1911, shows in the values of manufactures an increase in the same period of 695·16 per cent. Hamilton, which ranks sixth in population, is third in the values of its products, with an increase in twenty years of 292·51 per cent. Maisonneuve is sixth in the values of products with an increase of 469·68 per cent. Ottawa is fifth in the values of products, with an increase in twenty years of 137·18 per cent. Quebec is eighth with an increase of 158·71 per cent, London is ninth with an increase of 97·84 per cent, and Brantford is tenth with an increase of 270·62 per cent. Galt, although lowest in population of the fourty-four places named in 1911, stands twenty-first in the volume of its manufactures. Calgary is tenth in population, but the value of its manufactures has increased in twenty years by 2,893·83 per cent, exceeding the ratios of all others.

The next summary table of industries, as arranged by values and totals of groups, is given on page xiv for each of the provinces. They are industries of (1) less than $200,000, (2) $200,000 to under $500,000, (3) $500,000 to under $1,000,000, (4) $1,000,000 to under $5,000,000, and (5) $5,000,000 and over. In the first group the average number of employees per establishment is 14·1, in the second 137·6, in the third 292·8, in the fourth 540·3, and in the fifth 1,404·7. It will be seen that there are fourteen establishments in the last group each with $5,000,000 and over; and the values of two of these are each over $10,000,000. Altogether there are 150 establishments with products valued at more than one million dollars, as compared with 39 in the first year of the century.

Table XIII at pp. 365-369 is a comparative statement for the years 1900 and 1910 of the manufactures of cities, towns and incorporated villages of the Dominion having a population of 1,500 and over, grouped by provinces. The population of each place is given as shown for the census years 1901 and 1911, together with the value of capital, the earnings of employees and the value of the products of industries for the calendar years 1900 and 1910. The number of cities, towns and villages increased during the decade from 199 to 278, viz.: 5 to 10 in Alberta, 9 to 15 in British Columbia, 4 to 8 in Manitoba, 10 to 14 in New Brunswick, 21 to 24 in Nova Scotia, 107 to 129 in Ontario, 2 to 2 in Prince Edward Island, 42 to 66 in Quebec, and 2 to 10 in Saskatchewan. The population of those cities, towns and villages grew in the decade from 1,771,435 to 2,845,073, the value of capital from $347,435,241 to $928,936,482, the value of earnings from $90,347,067 to $193,355,373, and the value of products from $361,354,833 to $901,770,217.

The urban population of the Dominion increased during the last decade from 1,771,435 to 2,845,073 for cities, towns and villages of 1,500 and over, and the rural and urban population from 5,371,315 to 7,206,643. The urban capital of manufactures increased during the same period by $581,501,241, and the rural and urban by $800,667,122. The urban earnings of wages and salaries increased by $103,008,306, and the rural and urban by $127,759,066. The urban products increased by $540,415,384, and the rural and urban by $684,922,264. The increase in the urban products of the manufactures of Alberta in the decade was $14,634,281, of British Columbia $16,776,854, of Manitoba $34,786,482, of New Brunswick $10,131,853, of Nova Scotia $25,882,919, of Ontario $275,513,965, of Quebec $158,512,912, and of Saskatchewan $4,298,558. In urban places of Prince Edward Island there was a decrease in the manufactures of $122,440.

A summary of table XIII for cities, towns and villages of 1,500 and over is given herewith for capital, earnings and products in 1910 and 1900, by provinces, together with their rural and urban totals for Canada, viz.:

CINQUIÈME RECENSEMENT DU CANADA, 1911.

RECENSEMENT DES MANUFACTURES.

MANUFACTURES DU CANADA POUR L'ANNÉE 1910, PAR PROVINCES ET DISTRICTS.

Le recensement des manufactures du Canada pris en juin 1911 pour l'année de Calendrier 1910, tel que présenté dans ce Rapport, dénote un mouvement satisfaisant de la prospérité industrielle du pays durant la dernière décade. En comparaison du recensement de 1901, fait pour l'année 1900, les rapports indiquent, pour la période de dix ans, une augmentation de 4,568 dans le nombre des établissements en opération, de $800,667,123 dans la valeur du capital, de 176,030 dans le nombre de personnes employées, de $127,759,066 dans le total des salaires et gages payés, et de $684,922,264 dans la valeur des produits manufacturés. En comparaison du recensement de 1905, fait en 1906 par voie postale, les rapports indiquent, pour les cinq années, une augmentation de $400,998,586 dans la valeur du capital, de 122,673 dans le nombre de personnes employées, de $75,908,405 dans le total des salaires et gages payés, et de $447,623,036 dans la valeur des produits manufacturés.

Le tableau suivant donne les principales statistiques pour les deux recensements de 1900 et de 1910, ainsi que l'augmentation totale et l'augmentation pour cent durant la décade:—

Liste.		1900	1910	Augmentation	
				Totale.	Pour cent.
Etablissements	NO.	14,650	19,218	4,568	31·18
Capital	$	446,916,487	1,247,583,609	800,667,122	179·15
Employés à salaire	NO.	30,691	44,077	13,386	43·61
Salaires	$	23,676,146	43,779,715	20,103,569	84·91
Employés à gages	NO.	308,482	471,126	162,644	52·72
Gages	$	89,573,204	197,228,701	107,655,497	120·19
Matières premières	$	266,527,858	601,509,018	334,981,160	125·68
Produits	$	481,053,375	1,165,975,639	684,922,264	142·38

Si l'on compare les rapports faits pour 1905 et pour 1910, l'augmentation pour cent du capital pendant une période de cinq ans a été de 47·36, celle des employés à salaire de 20·77, des salaires payés de 42·49, des employés à gages de 32·32, des gages de 46·77, et des produits de 62·31. On n'a pas tenu compte de la valeur des matières premières pour l'année 1905. La comparaison des rapports faits pour 1900 et 1905 indique un percentage d'augmentation de 89·43 pour le capital, de 18·91 pour les employés à salaire, de 29·77 pour les salaires, de 15·41 pour les employés à gages, de 50·02 pour les gages et de 49·32 pour les produits.

Les instructions données pour faire le recensement des manufactures ont été les mêmes pour chacune des trois années, et elles ont été assez précises pour que les recenseurs les aient trouvées parfaitement claires. Le mot 'capital' qui n'est pas toujours bien compris parce que souvent il s'applique aussi au crédit d'un industriel, a été appliqué, pour les fins du recensement, comme signifiant (1) le terrain, les bâtiments et l'outillage de la manufacture, et (2) le capital actif en argent ou autres fonds de l'établissement. Par conséquent, pour les besoins de l'uniformité, le capital employé dans un établissement industriel, comprend, (1) la valeur du terrain, des bâtiments et de l'outillage qui peut comprendre aussi l'argent emprunté pour les opérations de l'usine. Il signifie le capital pour l'année de recensement, et représente en fait le capital pour chacune des années, attendu qu'il arrive souvent que l'argent est emprunté aux fins de continuer les opérations. Cette définition, ainsi que les instructions additionnelles, étaient imprimées sur le verso de la liste, de même que dans le livre des instructions données, et une copie devait en être fournie par le recenseur au manufacturier pour lui servir de guide. Le recenseur devait, en outre, aider le manufacturier dans les réponses aux questions posées dans la liste, ou remettre ses réponses à une date ultérieure donnée dans l'avis signé au bas de la liste, alors qu'il viendrait chercher cette liste dûment remplie. Dans plusieurs cas, si l'industrie avait peu d'importance, les réponses pouvaient être données au recenseur sans délai; tandis que dans le cas où il s'agissait d'une industrie vaste et compliquée, il était plus expéditif de fixer une date avec le propriétaire ou le gérant pour lui permettre de faire les entrées avec soin et d'accord avec les livres ou régistres de la manufacture; nous avions à traiter avec des hommes d'affaires. Le tableau 1, montrant les manufactures par provinces, donne les statistiques des établissements, du capital, des salaires et gages, du coût des matériaux et de valeur des produits par sortes d'industries.

Le montant des salaires et gages payés aux employés se rapporte à tous les officiers, gérants ou travailleurs qui ont eu de l'emploi pendant l'année 1910, aussi bien que pendant les années 1900 et 1905, en faisant la distinction entre (1) les hommes et les femmes, (2) entre les enfants de moins de 16 ans, et (3) entre les ouvriers à la pièce employés hors de l'établissement. Quant aux hommes et aux femmes de plus de 16 ans, le nombre en est donné dans le tableau qui suit, ainsi que leurs salaires et gages:—

Année du recensement	Employés à salaire				Employés à gages			
	hommes	$	femmes	$	hommes	$	femmes	$
1900.....	28,540	22,994,574	2,151	631,572	226,663	75,626,888	61,220	10,757,590
1905.....	31,545	28,938,637	4,951	1,785,449	238,033[1]	119,550,821	68,001[1]	14,825,104
1910.....	37,702	40,927,955	6,375	2,351,760	376,872	173,425,642	72,571	18,970,212

[1] Y compris les personnes de moins de 16 ans.

Le nombre des employés à gages ayant moins de 16 ans pour l'année 1900 a été de 12,143 ayant gagné $1,288,488, et pour l'année 1910 il a été de 13,282 ayant gagné $2,112,648. Le nombre d'ouvriers à la pièce employés en dehors des manufactures a été 8,456 pour l'année 1900 ayant gagné $1,900,238, et il a été de 8,401 pour l'année 1910 ayant gagné $2,710,199. Le montant d'argent gagné par ces deux classes représente 3·56 pour cent de tous les gages gagnés en 1900, et de 2·45 pour cent des gages gagnés en 1910. On n'a pas fait cette distinction pour l'année 1905.

Les instructions pour le recensement de 1901 comportaient qu'on ne devait pas compter comme manufactures les établissements où l'on employait moins de cinq personnes, mais elles faisaient exception pour les fromageries et les beurreries, et pour les briqueteries et les tuileries, établissements dans lesquels il est possible de poursuivre des opérations considérables avec moins de cinq employés. Mais on fit observer que cette règle devrait aussi s'appliquer aux moulins à farine et aux etablissements de lumière électrique; et en conséquence l'on fit pour le recensement de 1906 et pour celui de 1911, la même exception pour les moulins à farine, les scieries (bois et ses produits), les conserves de poisson, les fours à chaux, et les établissements de lumière et de moteurs électriques, aussi bien que pour les beurreries, fromageries, briqueteries et tuileries, quand ces établissements employaient moins de cinq personnes. Ces exceptions ont ajouté au capital pour l'année 1905 la somme de $8,886,303, et pour l'année 1910 la somme de $14,658,010. Elles ont ajouté à la valeur des produits pour l'année 1905 la somme de $8,901,486, et pour l'année 1910 la somme de $17,753,848. Elles n'ont changé toutefois les totaux pour toutes les industries que dans une minime proportion. En effet, la différence n'a été qu'un peu plus de 1 pour cent pour la valeur du capital en 1905 et en 1910, 1·24 pour cent pour la valeur des produits pour l'année 1905, et 1·52 pour cent pour l'année 1910.

La diminution dans le nombre des industries pour l'année 1905 qui employaient moins de cinq personnes, tel qu'expliqué dans le rapport de cette année-là, est due, en partie, au fait que les industries moindres ont été réunies aux plus grandes industries sous une même direction; et aussi au fait que dans le cas des établissements plus considérables qui s'occupent de plusieurs industries, un seul rapport a été fait pour l'année 1905, tandis que pour l'année 1900 on a fait un rapport séparé dans chaque cas. La fusion des diverses industries s'est continuée pendant la seconde période, de façon que le nombre de celles qui employaient cinq personnes et au-dessus, ayant été de 12,547 pour 1905 et de 16,207 pour 1910, au lieu de 14,650 pour 1900, la valeur des produits s'est élevée néanmoins, pendant les périodes des recensements successifs, de $481,053,375 en 1900 à $706,446,578 en 1905 et à $1,148,221,791 en 1910.

Le tableau des groupements de produits pour chaque industrie donne, pour chacun des quinze groupes, le nombre des établissements, le capital engagé, le nombre des employés à gages, le montant des gages gagnés, le coût de la matière première ou non ouvrée, et la valeur des produits.

Il démontre pour les industries excédant $60,000,000, que les produits alimentaires tiennent la première place quant à la valeur des produits; le bois de service et ses diverses industries la seconde; les textiles la troisième; les pro-

duits du fer et de l'acier la quatrième; les métaux et leurs produits, excepté le fer et l'acier, la cinquième; les industries diverses la sixième; les voitures pour transport par terre la septième; le cuir et ses produits finis la huitième. Exception faite des employés à salaire, qui étaient au nombre de 44,077 et qui ont reçu en argent $43,779,715, les chiffres sont donnés dans le tableau suivant:—

Dans les groupes produisant moins de $200,000 pour l'année 1910, on trouve que 18,121 établissements ont manufacturé pour une valeur de $431,336,533, ont employé une moyenne de 14·01 personnes et ont rapporté une production moyenne de $23,803.

Dans les groupes qui ont produit de $200,000 à moins de $500,000 pendant l'année 1900, il y a 323 établissements qui ont produit une valeur de $94,531,698; et pour l'année 1905 il y en a 479 qui ont produit une valeur de $145,587,183. Dans les groupes dont la valeur productive est de $500,000 à moins de $1,000,000, pendant l'année 1900, il y en a 68 qui ont produit une valeur de $46,729,825; et en l'année 1905, il y en a 139 ayant produit une valeur de $92,065,800. Dans les groupes qui ont produit une valeur de $1,000,000 et au delà, il y en a 39 qui ont produit $71,051,834 dans l'année 1900, et 81 ayant produit $177,273,913 dans l'année 1905. La valeur moyenne pour chaque établissement produisant la somme de $200,000 à $500,000 a été, pour l'année 1900, de $292,668, pour l'anné 1905 de $303,940, et pour l'année 1910 de $306,005, comparativement à une moyenne de $687,203 pendant l'année 1900 .pour les groupes de $500,000 à $1,000,000, de $662,344 pour l'année 1905, et de $677,572 pour l'année 1910; et dans les groupes donnant une valeur de plus d'un million, une moyenne de $1,821,842 pour l'année 1900, de $2,188,567 pour l'année 1905, et de $2,393,471 pour l'année 1910. Dans la Nouvelle-Ecosse, en 1910, un établissement montre une production de plus de $8,000,000; dans l'Ontario, un établissement a produit au delà de $9,000,000; et deux dans Québec ont produit pour plus de $10,000,000 chacun. Pour l'année 1910, quatorze des principaux établissements du Canada ont produit une moyenne de $6,995,677.

Si l'on fait la comparaison entre les diverses provinces, le recensement des manufactures donne les chiffres suivants pour les années 1900, 1905 et 1910. tels qu'ils ont été établis en 1901, 1906 et 1911:—

L'augmentation du capital engagé dans les diverses industries pendant la première période de dix ans a été de 34·76 pour cent, dans la seconde période de 179·15 pour cent, et dans les vingt ans de 276·19 pour cent. L'augmentation dans le prix des salaires et des gages payés a été de 42·96 pour cent pendant la première période, de 112·75 pour cent pendant la seconde période, et de 204·17 pour cent pendant la période de vingt ans. L'augmentation dans la valeur des produits a été, pour la première période, de 30·47 pour cent, de 142·38 pour cent pour la seconde période, et de 216·24 pour cent pour la période de vingt ans. L'augmentation la plus considérable dans la valeur des capitaux employés se trouve dans le groupe des industries diverses et elle est de $191,956,786, soit 444·43 pour cent; la plus grande augmentation dans les salaires et les gages payés dans le groupe des industries du bois, ayant été de $27,376,899, soit 146·72 pour cent; et la plus grande augmentation dans la valeur des produits se trouve dans le groupe des produits alimentaires, ayant été de $169,710,334, soit 223·42 pour cent.

La province qui dénote la plus forte proportion dans l'augmentation de la valeur des produits, pour les dix années écoulées de 1900 à 1910, est l'Alberta; cette proportion est de 1,330·64 pour cent, et le montant de l'augmentation de $17,475,506. Le Manitoba accuse une augmentation pendant cette même période de $40,746,139 ou 315·19 pour cent. La Colombie Britannitannique une augmentation de $45,756,457 ou 234·77 pour cent; Ontario une augmentation de $338,276,739 ou 140·05 pour cent; Québec une augmentation de $192,613,662 ou 121·69 pour cent; l'Ile du Prince-Edouard une augmentation de $809,762

ou 34·80 pour cent et la Saskatchewan $5,680,465 ou 871·68 pour cent, tel que l'indique le tableau suivant:

Les cités et les villes, en tant que corporations municipales, sont classées depuis Montréal jusqu'à Galt d'après leur popupation respective. Montréal avait, en 1890 une population de 219,616 habitants, et ses manufactures étaient évaluées à $67,654,060. Pendant la période de vingt ans l'augmentation des manufactures a été de 145·81 pour cent. Toronto dont la population était de 181,215 habitants en 1890 a vu ses manufactures augmenter en valeur dans une proportion de 243·18 pour cent pendant une période de vingt ans. Winnipeg qui avait, en 1891, des manufactures ayant une valeur de $5,611,240 et une population de 25,639 occupe la troisième place, et dénote une augmentation de 482·65 pour cent en valeur pendant cette même période. Vancouver dont la population s'est augmentée pendant vingt ans de 13,709 qu'elle était en 1891 à 100,401 en 1910, dénote une augmentation dans la valeur de ses manufactures de 695·16 pour cent pendant cette même période. Hamilton, qui tient la sixième place d'après la population, est la troisième pour ce qui regarde la valeur des produits, ayant augmenté pendant vingt ans dans une proportion de 292·51 pour cent. Maisonneuve vient la sixième si l'on considère la valeur des produits avec une augmentation de 469·68 pour cent. Ottawa est la cinquième pour ce qui regarde la valeur des produits, et elle dénote une augmentation, pendant vingt ans, de 137·18 pour cent. Québec est la huitième avec une augmentation de 158·71 pour cent. London est la neuvième avec une augmentation de 97·84 pour cent, et Brantford la dixième avec une augmentation de 270·62 pour cent. Galt se trouve la vingt-unième au point de vue du volume du produit de ses manufactures, bien que d'après sa population elle soit la dernière des quarante-quatre places nommées pour l'année 1911. Calgary est la dixième d'après la population, mais la valeur de ses manufactures a augmenté dans la période de vingt ans dans une proportion de 2,893·83 pour cent, proportion qui la place à la tête de toutes les villes.

Un tableau sommaire des industries, disposé par groupes de valeurs et de totaux, est donné à la page xv pour chacune des provinces. Ce sont les industries de (1) moins de $200,000, (2) de $200,000 à moins de $500,000, (3) de $500,000 à moins de $1,000,000, (4) de $1,000,000 à moins de $5,000,000 et (5) de $5,000,000 et plus. Dans le premier groupe la moyenne des employés par établissement est de 14·1 dans le second de 137·6, dans la troisième de 292·8, dans le quatrième de 540·3 et dans le cinquième de 1,404·7. On remarquera qu'il y a quatorze établissements dans le dernier groupe avec chacun au delà de $5,000,000; et les valeurs de deux de ces établissements s'élèvent à plus de $10,000,000 chacun. Il y a en tout 150 établissements avec un volume de production dépassant un million, comparativement à 39 dans la première année du siècle.

Le tableau XIII (pages 365-369) est un état comparatif, pour les années 1900 et 1910, des manufactures des cités, villes et villages incorporés du Canada ayant une population de 1,500 et plus, groupées par provinces. La population de chaque endroit est donnée d'après les recensements de 1901 et 1911, ainsi que la valeur du capital, les salaires et gages payés aux employés et la valeur des produits des industries pour les années de calendrier 1900 et 1910. Le nombre de cités, villes et villages incorporés a augmenté de 199 à 278 durant la décade, comme suit:—de cinq à dix dans l'Alberta, de neuf à quinze dans la Colombie-

Britannique, de quatre à huit dans le Manitoba, de dix à quatorze dans le Nouveau-Brunswick, de 21 à 24 dans la Nouvelle-Ecosse, de 107 à 129 dans Ontario, deux pour les deux années dans l'Ile du Prince-Edouard, de 42 à 66 dans Québec, et de deux à dix dans la Saskatchewan. La population de ces cités, villes et villages a augmenté, durant la décade, de 1,771,435 à 2,845,073, la valeur du capital de $347,435,241 à $928,936,482, la valeur des salaires et gages de $90,-347,067 à $193,355,373, et la valeur des produits de $361,354,833 à $901,770,217.

La population urbaine du Canada a augmenté durant la dernière décade, de 1,771,435 à 2,845,073 pour les cités, villes et villages de 1,500 âmes et plus, et la population rurale et urbaine de 5,371,315 à 7,205,884. Le capital urbain des manufactures a augmenté durant la même période de $581,501,241 et le capital rural et urbain de $800,667,122. Les salaires et gages urbains ont augmenté de $103,008,306 et les salaires et gages ruraux et urbains de $127,759,066. Les produits urbains ont augmenté de $540,415,384, et les produits ruraux et urbains de $684,922,264. L'augmentation dans les produits urbains des manufactures dans l'Alberta, durant la décade, était de $14,634,281, dans la Colombie-Britannique, de $16,776,854 dans le Manitoba de $34,786,482, dans le Nouveau-Brunswick de $10,131,853, dans la Nouvelle-Ecosse de $25,882,919, dans Ontario de $275,513,965, dans Québec de $158,512,912, et dans la Saskatchewan de $4,298,558. Dans les endroits urbains de l'Ile du Prince-Edouard il y eu une diminution de $122,440 dans les manufactures.

Un sommaire du tableau XIII, pour les cités, villes et villages de 1,500 âmes et plus, est ici donné montrant le capital, les salaires et les gages gagnés et les produits en 1910 et 1900 par provinces, ainsi que les totaux ruraux et urbains pour le Canada:
